

Two Cigar-Shaped UFOs Reported Over Radcliff, Kentucky

On **June 5, 2026**, at approximately **12:15 AM local time**, two residents of Radcliff reported witnessing an unusual aerial event while walking at night.

The sighting was submitted to the National UFO Reporting Center under case number **198293**. According to the report, two unidentified objects moved through the sky together, displaying movements and characteristics that the witnesses believed were inconsistent with conventional aircraft.

The event reportedly lasted only about **five seconds**, but the observers described a series of unusual phenomena, including extreme acceleration, impossible turns, strange lighting effects, and a possible interaction with military aircraft.

Two “Tic-Tac” Shaped Objects Moving at Extreme Speed

According to the witnesses, the objects appeared to have a **cigar-like or “tic-tac” shape**, similar to descriptions from several well-known modern UFO cases. They were described as having a **gray appearance**, surrounded by a red outline or beam-like glow that illuminated the surrounding sky.

The estimated size was compared to **three standard vans placed end-to-end**, suggesting a large object despite its distance.

The witnesses reported seeing the objects toward the **northwest**, at an estimated elevation angle of approximately **70 degrees**. Their closest distance was estimated at around **15,000 feet** (approximately 4.5 kilometers).

The most striking detail was the reported speed, estimated by the observers at around **3,000 mph** (approximately 4,800 km/h), combined with sudden changes in direction.

“They were making turns impossible for aircraft to make.”

Maneuvers Beyond Conventional Aircraft Capabilities

The witnesses stated that the two objects:

- remained at a constant distance from each other;
- moved in perfect synchronization;
- changed direction rapidly from left to right without visible slowing;
- appeared to be searching for something in the sky.

The report describes their acceleration as “insane,” with movements occurring almost instantly.

Another unusual detail was the reported lack of sound. Despite their apparent speed, the objects allegedly produced no aircraft-like engine noise or sonic signature during their flight.

Military Aircraft and Sudden Disappearance

The witnesses reported seeing several military aircraft approaching the area shortly after the objects appeared.

According to their account, as the military aircraft arrived, the two unidentified objects suddenly vanished.

A bright sphere of light reportedly remained for approximately two seconds:

“It looked like excess energy being discarded.”

The witnesses described the final moment as similar to a light being switched off. They also reported hearing two faint bangs immediately afterward, followed by complete silence.

Reported Physical Effects After the Sighting

The account includes several physical effects experienced after the observation. The witness's wife reportedly experienced:

- a burning sensation;
- a severe headache.

The report also mentions possible animal reactions and possible electrical or magnetic effects, although these details remain based solely on witness testimony.

A Location Near a Major Military Facility

Radcliff is located in Kentucky near Fort Knox, one of the United States' most well-known military installations.

This geographical factor has led to speculation about possible military activity, experimental aircraft, or classified aerospace testing. However, no official confirmation has been released regarding any military operation connected to the sighting.

A Modern UFO Case Still Without Explanation

As with many UFO reports, several possible explanations can be considered:

- misidentification of military aircraft or advanced drones;
- unusual atmospheric or optical phenomena;
- inaccurate estimates of distance, speed, or size;
- an unidentified aerial event that cannot currently be explained.

The reported characteristics — a **tic-tac shape, lack of sound, extreme acceleration, and possible military involvement** — are similar to details found in other modern unidentified aerial phenomena (UAP) reports.

At present, the Radcliff sighting remains an **unverified eyewitness account**, but it adds another case to the growing archive of unexplained aerial observations reported across the United States.
